London Neonatal Network NHS

Unpicking complexity in neonatal care

2026 Webinar series

Join neonatal colleagues from across London for a quarterly webinar series designed to look beneath the surface of the challenges we face in everyday practice. Each session offers a deeper, psychologically informed exploration of complex issues in neonatal care - creating space for reflection, learning, and connection.

4th February	Ethics and moral distress in neonatal decision-making
29th April	Supporting neurodivergent people in the neonatal environment
24th June	Health inequalities: where do we go from here?
7th October	How compassion enhances safety for babies, families, and staff

Together, we'll build understanding, strengthen confidence, and foster more compassionate, equitable neonatal care.

Join us online 2-4pm for an expert discussion of the issues
